

**REQUIRED TREATMENT VOLUME WORKSHEET
FOR
STORM WATER FACILITIES**

Water Quality Volume Required?	Yes _____	No _____
--------------------------------	-----------	----------

(If the following is checked yes, water quality volume is NOT required.)

- Percent impervious of a low density residential development less than or equal to 30%, and does not discharge to an inland lake. Yes _____ No _____

Stream Protection Volume Required?	Yes _____	No _____
------------------------------------	-----------	----------

(If the following is checked yes, stream protection volume is required.)

- Discharge to a natural water course. Yes _____ No _____

Flood Control Volume Required?	Standard _____	Alternate _____
--------------------------------	----------------	-----------------

(If any of the following are checked yes, alternate flood control volume may be allowed.)

- Development located in a “no-detention” zone identified in a watershed management plan. Yes _____ No _____
- Direct discharge to a lake. Yes _____ No _____
- Direct discharge to a river. Yes _____ No _____
- Direct discharge to a storm sewer designed to accommodate peak flows higher than the maximum allowable release rate. Yes _____ No _____

Spill Containment Volume Required?	Yes _____	No _____
------------------------------------	-----------	----------

(If both of the following are checked yes, spill containment volume is required.)

- Land use activity a designated storm water hot spot. Yes _____ No _____
- Infiltration is proposed. Yes _____ No _____
