PLEASE NOTE: Photographs may expedite the application process.

For shore protection structures, take photographs from the following locations:

- At the water’s edge, from both property lines looking along the shore towards the center of the property.
- From the water looking towards the center of the property, showing property lines and adjacent properties.

For stream crossing structure(s), take photographs from the following locations:

- Upstream and downstream of proposed stream crossing(s) looking toward crossing.

All photographs must be labeled, dated, and referenced to the plan submitted with the application.

Proposed activities or structure(s) may be indicated directly on the photographs by using indelible markers or ink pens.
